

## City Health Plans for Pune, Jaipur and Bhubaneswar, India

**Project Name:** Preparation of Model City Health Plans for Bhubaneswar, Pune, Jaipur  
**Client Name:** Population Foundation of India  
**Country:** India  
**Length of assignment:** September 2012 - Ongoing

### Project Brief

The Population Foundation of India (PFI) was awarded by USAID/India to facilitate a program on 'Health of the Urban Poor' (HUP). The goal of the programs is to improve health of urban poor through sustainable intervention approaches—the program aims to develop and sustain effective programs for the urban poor's living conditions. HUP works in 8 states and 5 cities in India. The objectives of the project are to understand service delivery of urban health at city level by local government bodies; conduct a situation survey and analysis of the same and provide packages and schemes to improve the health services; develop a plan to provide health facilities at all levels of society; create a budget for 5-year urban health plan keeping in mind existing budget template of NRHM.

### Detailed Description of the Actual Services Provided by UMC

UMC will conduct surveys and consultations as per requirement of the project to develop the city health plans.

- Create updated slum list and city health map by obtaining base map from sources, check and update list of slums, organize and conduct stakeholder consultative meetings with community members and workers and update the same; facilitate group discussions to note requirement of quantity of health services; gather list of AWCs from the CDPOs in the city; mark slums, public health facilities, private health facilities, AWCs, community structures under JNNURM/SJSRY/ ICDS on the base map.
- To facilitate assessment of health facilities through study and survey of public and private health facilities; conduct interviews of officials of the ULB, UD, Health and WCD departments at city level and compile data to generate a profile of the city administration's health service delivery.
- Assess and review current and prevalent health service schemes.
- Develop health package for city and create health service delivery strategies.
- Prepare city health plan and budget for health plan.
